

Owned and operated by the Fond du Lac Band of Lake Superior Chippewa, Fond-du-Luth Casino is located in the heart of downtown Duluth.

The Challenge

Fond-du-Luth Casino in downtown Duluth was undergoing a third-floor renovation that required a full window replacement. The general contractor needed someone to coordinate closely with another sub-contractor responsible for the demolition on the existing openings, ensuring a seamless transition to the installation phase without disrupting casino operations or compromising the building's structure.

The Solution

St. Germain's Glass stepped in following the demo phase to supply and install all new window frames and glass on the third floor. Our team worked efficiently and precisely, aligning with the project schedule and adapting to the unique conditions of the site. By focusing solely on installation, we were able to deliver high-quality glazing solutions that enhanced both the performance and appearance of the building.

Results Accomplished

The upgraded windows brought improved energy efficiency, better daylighting, and a refreshed look to the casino's third floor. Our work was completed on time and in coordination with the broader renovation team, contributing to a smooth project flow and a successful transformation of the space.

Why was St. Germain's Glass best suited for this project?

With deep experience in commercial glazing and a reputation for reliability, St. Germain's Glass was the ideal partner for this project. Our ability to collaborate seamlessly with other contractors, combined with our commitment to craftsmanship and care, ensured a high-quality result. Backed by the Brin family of companies, we delivered not just glass—but confidence, precision, and pride in every detail.
